The applicant is responsible for ordering and paying for all such transcripts and evaluations. Additional academic information, including but not limited to grades and transfer credit, shall be submitted to the board at the request of the executive director.

(2) The degree evaluation must:

(A) validate the authenticity of the transcript, diploma, and any other supporting documentation;

(B) include a detailed, course-by-course evaluation of courses, including semester hours and grades;

- (1) Part 1: Experience Summary. The Experience Summary is a description of qualifying experience divided into employment engagements that correspond to those listed in the application and shall be written in sufficient detail to allow a board reviewer to document the minimum amount of experience required and to recognize and verify the quality and quantity of the experience claimed.
- (2) Part 2: Professional Competence Profile. The Professional Competence Profile is a description of experience across engagements to demonstrate competency in a number of categories related to professional practice. The profile shall be written in sufficient detail to allow a board reviewer and reference provider to determine the suitability of an applicant for professional licensure.

(c) The experience report shall be written by the applicant and shall:

- (1) provide an overall description of the nature and scope of the work with emphasis on detailed descriptions of the engineering work;
- (2) clearly describe the engineering work that the applicant personally performed;

(f) Experience that is unsupported by verification or references may not be considered.

(g) Experience from part-time employment must be accounted for proportionally to a standard 40-hour work week, if it was part-time employment.

(h) The experience report must cover at least the minimum amount of time needed by the applicant for issuance of a license.

- (1) Applicants applying under §1001.302(a)(1)(A) of the Act shall provide an experience report describing a minimum of four years of qualifying engineering experience.
- (2) Applicants applying under §1001.302(a)(1)(B) of the Act shall provide an experience report describing a minimum of eight years of engineering experience.

§133.43 EXPERIENCE EVALUATION

(a) The board shall evaluate the nature and quality of the experience found in the experience report or the NCEES record experience information and shall determine if the experience is satisfactory to the board for the purpose of issuing a license to the applicant. The board shall evaluate the experience report for evidence of the applicant's competency to be placed in responsible charge of engineering work of a similar character.

- (1) Engineering experience shall be satisfactory to the board and, therefore, considered by the board to be creditable engineering experience for the purpose of licensure if it is of such a nature that its adequate performance requires engineering education, training, or experience. The application of engineering education, training and experience must be demonstrated through the application of the mathematical, physical, and engineering sciences. Such experience must be fully described in the experience report. Satisfactory engineering experience shall include an acceptable combination of design, analysis, implementation, and/or professional and communication experience, including the following types of engineering activities:
- (A) design, conceptual design, or conceptual design coordination for engineering works, products or systems;
 - (B) development or optimization of plans and specifications for engineering works, products, or systems;
 - (C) analysis, consultation, investigation, evaluation, planning or other related services for engineering works, products, or systems;
 - (D) planning the use or alteration of land, water, or other resources;
 - (E) engineering for program management and for development of operating and maintenance manuals;
 - (F) engineering for construction, or review of construction;
 - (G) performance of engineering surveys, studies, or mapping;
 - (H) engineering for materials testing and evaluation;
 - (I) expert engineering testimony;
 - (J) any other experience of a mechanical, electrical, electronic, chemical, hydraulic, pneumatic, geotechnical, or thermal nature that requires engineering education, training or experience for its adequate performance;
 - (K) the teaching of engineering subjects by a person who began teaching prior to September 1, 2001; and
 - (L) other professional skills necessary for the adequate performance of an engineering service.
- (2) In the review of engineering experience, the board may consider additional elements including:
- (A) whether the experience was sufficiently complex and diverse, and of an increasing standard of quality and responsibility;
 - (B) whether the quality of the engineering work shows minimum technical competency;
 - (C) whether the experience was gained in accordance with the provisions of the Act;
 - (D) whether the experience was gained in one dominant branch;
 - (E) whether non-traditional engineering experience such as sales or military service provides sufficient depth of practice;
 - (F) whether short engagements have had an impact upon professional growth;
 - (G) whether the applicant intends to practice or offer engineering services in Texas; and
 - (H) whether the experience was supplemented by training courses or participation in engineering organizations or societies that contribute to the applicant's competence and readiness for licensure (consistent with the requirements listed in §137.17 of this title (relating to Continuing Education Program)).
- (3) Engineering experience may be considered satisfactory for the purpose of licensing provided that:
- (A) the experience is gained during an engagement longer than three months in duration;
 - (B) the experience, when taken as a whole, meets the minimum time;
 - (C) the experience is not anticipated and has actually been gained at the time of application;
 - (D) the experience includes at least two years of experience in the United States, not including time claimed for educational credit, or otherwise includes experience that would show a familiarity with US codes and engineering practice; and
 - (E) the time granted for the experience claimed does not exceed the calendar time available for the periods of employment claimed and the calendar time has not been claimed for surveying experience in a surveying application.
- (b) Experience credit may be granted for experience gained prior to an applicant's receiving a conferred degree per §133.31 of this chapter (relating to Educational Requirements for Applicants). Effective January 1, 2009, experience gained in this manner is limited to a total of two years, and must:
- (1) be substantiated and verified in the experience report;
 - (2) be accounted for proportionally to a standard 40-hour work week, if it was part-time employment; and
 - (3) reflect that, at the time the experience was gained, the applicant had passed junior and/or senior level engineering or related engineering science courses and applied relevant engineering knowledge in the claimed experience.
- (c) One year of experience credit may be granted for each post-baccalaureate engineering degree earned by an applicant, provided:
- (1) the applicant has a baccalaureate or other post-baccalaureate degree in engineering meeting the requirements of §133.31(a)(1) of this chapter (concerning Educational Requirements for Applicants); and
 - (2) the post-baccalaureate degree is from an engineering program where either the graduate or undergraduate degree in the same discipline is accredited or approved by one of the organizations listed in §133.31(a)(1) of this chapter. Experience credit for all post-baccalaureate degrees is limited to a total of two years.
- (d) Engineering Educators applying for a waiver of examinations under §133.69 of this chapter (relating to Waiver of Examinations) will not receive additional experience credit pursuant to subsection (c) of this section.
- (e) Experience that has received educational credit or has been gained as part of an education will not be credited as experience.
- (f) For Engineering Educator applicants applying under §133.25 of this chapter (relating to Applications from Engineering Educators), other acceptable creditable engineering experience may include, but is not limited to, scholarly activity such as publishing papers in technical and professional journals; making technical and professional presentations; publishing books and monographs; performing sponsored research; reporting on research conducted for sponsors; supervising research of undergraduate and graduate students, postdoctoral fellows, or other employees; providing counseling, guidance, and advisement for engineering students; and performing certain other types of formal or informal functions in higher education.

SUBCHAPTER H: REVIEW PROCESS OF APPLICATIONS AND LICENSE ISSUANCE

§133.81 RECEIPT OF APPLICATIONS

- (a) Upon receipt of an application for licensure and application fee at the board office, the board shall initiate a review of the credentials submitted.
- (b) Once an application and fee is received by the board, no refunds will be granted. By submitting an application and fee, the applicant attests that he or she has reviewed the education, experience, reference, and examination requirements for licensure as prescribed in this chapter and that he or she is qualified for a license based on these requirements.
- (c) Once an application has entered the review process as described in §133.83 of this chapter (relating to Processing, Review, and Evaluation of Applications), the executive director may determine that the application has been so altered by the addition of supplemental information that the description of the applicant's qualifications has been substantially revised. If the executive director determines that an application is substantially revised, the application will be treated as a new application and reviewed under the rules in place on the date of the determination. The executive director will provide an applicant with written notice if an application is determined to be substantially revised. If the applicant disagrees with a determination by the Executive Director, the applicant may make an appeal to the Licensing Committee.
- (d) Once an application has been reviewed and before a license has been issued or denied, the board will not accept a new or amended application from the applicant. This does not prohibit the executive director, a board member, or the board from requesting, when they deem necessary, additional information from an applicant regarding his or her application.
- (e) In the event that information bearing on the suitability of an applicant is discovered after submission of an application but prior to issuance of a license, the board may rescind or alter any previous decision, or hold the application in abeyance, or may deny an application until the suitability of the applicant is adequately established.
- (f) An applicant may request an application to be withdrawn from consideration provided that the application has not been approved for licensure subject to passage of an examination. All requests for withdrawal must be submitted to the Board in writing.
- (g) An applicant may only have one pending application on file with the board at any time.
- (h) Pursuant to Chapter 55, Texas Occupations Code, an application for license from a military service member, military veteran or military spouse shall be processed and reviewed as soon as practicable in accordance with subsection (a) of this section. All other applications will be processed in the order they were received.
- (i) All information on an application must be filled out completely and accurately and attested to as complete and accurate by the applicant. Information submitted inaccurately, fraudulently, or deceitfully may result in action by the board up to and including denial of the application.

 - (11) A passing score on the NCEES Principles and Practice of Engineering examination in accordance with §133.71 of this title - - 14 PDH.
- (i) Determination of Credit
- (1) The board shall be the final authority with respect to whether a course or activity meets the requirements of these rules.
 - (2) The board shall not pre-approve or endorse any CEP activities. It is the responsibility of each license holder to assure that all PDH credits claimed meet CEP requirements.
 - (3) Credit for college or community college approved courses will be based upon course credit established by the college.
 - (4) Credit for seminars and workshops will be based on one PDH unit for each hour of attendance. Attendance at programs presented at professional and/or technical society meetings will earn PDH units for the actual time of each program.
 - (5) Credit for self-directed study will be based on one PDH unit for each hour of study and is not to exceed 10 PDH per renewal period. Credit determination for self-directed study is the responsibility of the license holder and subject to review as required by the board.
 - (6) Credit determination for activities described in subsection (h)(4) of this section is the responsibility of the license holder and subject to review as required by the board.
 - (7) Credit for activity described in subsection (h)(7) of this section requires that a license holder serve as an officer of the organization, actively participate in a committee of the organization, or serve in other official positions. 1 PDH credit is earned for each hour of active participation.
 - (8) Credit for teaching, instructing, or presenting each unique course or seminar may only be earned once per renewal period.
- (j) The license holder is responsible for maintaining records to be used to support credits claimed. Records required include, but are not limited to:
- (1) information on the type of activity claimed, sponsoring organization, location, duration, instructor's or speaker's name, and PDH credits earned; and
 - (2) documentation to verify attendance in the form of completion certificates, agendas, conference flyers or other documents supporting evidence of attendance.
- (k) In accordance with §137.7(c) of this Chapter, relating to License Expiration and Renewal, the license holder must certify that CEP requirements have been satisfied for that renewal period. If the CEP requirements have not been met, the license holder shall wait to renew the license until such time that they have been met or the license holder shall change the license to inactive status in accordance with §137.13, relating to Inactive Status.
- (l) CEP records for each license holder must be maintained for a period of four years by the license holder.
- (m) CEP records for each license holder are subject to audit by the board or its authorized representative.
- (1) Copies must be furnished, if requested, to the board or its authorized representative for audit verification purposes.
 - (2) If upon auditing a license holder, the board finds that the activities cited do not fall within the bounds of educational, technical, ethical, or professional management activities related to the practice of engineering; the board may require the license holder to acquire additional PDH as needed to fulfill the minimum CEP requirements.
- (n) A license holder may be exempt from the professional development educational requirements for one of the following reasons listed in paragraphs (1) - (4) of this subsection:
- (1) License holders shall be exempt prior to their first renewal.
 - (2) A license holder serving on active duty and deployed outside the United States, its possessions and territories, in or for the military service of the United States for a period of time exceeding one hundred twenty (120) consecutive days in a given year of the renewal period shall be exempt from obtaining 15 hours of professional development hours during that year. A licensee may be eligible for an exemption for each year of the renewal period. If selected for a CEP audit, a license holder claiming an exemption by reason of serving on active duty and deployed outside the United States, its possessions and territories, shall submit supporting documentation to demonstrate the license holder's eligibility for this exemption.
 - (3) License holders experiencing disability, illness, or other clearly extenuating circumstances that prevented the licensee's ability to work during a substantial period of either or both years of the renewal period may qualify for a partial or full exemption from the continuing education requirements for the renewal period.
 - (A) If the disability, illness, or other extenuating circumstances only occurred during one year of the renewal period, an exemption of up to 15 hours may be claimed. If the disability, illness, or other extenuating circumstances occurred during the entire renewal period, an exemption of up to 30 hours may be claimed.

(B) If selected for a CEP audit, a license holder claiming an exemption by reason of disability, illness, or other clearly extenuating circumstances shall submit supporting documentation in the form of a sworn statement by the licensee, a statement from a licensed healthcare provider, or records documenting the disability, illness, or circumstances that prevented the licensee's participation in the continuing education program during a substantial period of the renewal period.

(C) If the board finds from the submitted documentation that good cause has been shown for a partial or full exemption, the board may exempt the licensee from the continuing education requirement for the renewal period in question.

(4) License holders who list their status as "Inactive" and who further certify that they are not providing professional engineering services in Texas shall be exempt from the professional development hours required.

(5) Documentation to support any claimed exemption must be supplied in response to a CEP audit.

(o) A license holder may bring an inactive license to active status by obtaining all delinquent PDH units and submitting copies of CEP records demonstrating compliance to the board or its authorized representative for verification purposes. If the license has been in inactive status for one year or less, the total number units of continuing education required to return to active status is 15. If the license has been in inactive status for more than one year, then 30 units of continuing education shall be required, and hours acquired must be within the two years prior to reactivation.

(p) Noncompliance:

(1) If a license holder does not certify that CEP requirements have been met for a renewal period, the license shall be considered expired and subject to late fees and penalties.

(2) Failure to comply with CEP reporting requirements as listed in this section is a violation of board rules and shall be subject to sanctions.

(3) A determination by audit that CEP requirements or exemption eligibility have been falsely reported shall be considered to be misconduct and will subject the license holder to disciplinary action.

(4) If found to be noncompliant, the board may require additional audits of the license holder.

SUBCHAPTER B: SEALING REQUIREMENTS

§137.31 SEAL SPECIFICATIONS

(a) Upon issuance of a license, each license holder is required to obtain a seal under the requirements of §133.97 of this title (relating to Issuance of License).

(b) In accordance with §1001.401(a) of the Engineering Act, physical and electronic seals shall be of the Board-authorized design illustrated in this section and shall be no larger than two inches in diameter. Regardless of seal size the engineer's name and number must be clearly legible.

(c) All physical seals obtained and used by license holders shall be capable of leaving a permanent ink image or permanent impression of the seal attached to the engineering work.

Figure: 22 TAC §137.31(c)

(d) All seals obtained and used by license holders shall contain any given name, commonly accepted variation of the given name, or initial combination with the surname as currently listed with the board and in the usual written signature. Nicknames shall not be permitted on a seal in lieu of a given name or initial combination. The name can be displayed on the seal using all uppercase letters such as "LESLIE H. DOE" or using the standard combination of upper and lowercase letters, such as "Leslie H. Doe". If after licensure, a license holder legally changes his/her name, the license holder must have a new seal or seals made showing the new legal name.

(e) Preprinting of blank forms with an engineer's seal, or the use of decal or other seal replicas is prohibited.

(f) When signing an engineering work, the engineer may utilize the designation "P.E." or other terms as described in §137.1 of this chapter (relating to License Holder Designations).

(g) This section does not prevent the reproduction of sealed and signed, original works for distribution.

§137.33 SEALING PROCEDURES

- (a) The purpose of the engineer's seal is to assure the user of the engineering product that the work has been performed or directly supervised by the professional engineer named and to delineate the scope of the engineer's work.
- (b) License holders shall only seal work done by them, performed under their direct supervision as defined in §131.2 of this title, relating to Definitions, or shall be standards or general guideline specifications that they have reviewed and selected. Upon sealing, engineers take full professional responsibility for that work.
- (c) When a license holder reviews and elects to use standards or general guideline specifications, those items shall be clearly labeled as such, shall bear the identity of the publishing entity, and shall be:
- (1) individually sealed by the license holder; or
 - (2) specified on an integral design/title/contents sheet that bears the engineer's seal, signature, and date with a statement authorizing its use.
- (d) License holders shall take reasonable steps to ensure the security of their physical or electronic seals and electronic signatures. For electronic seals and electronic signatures, the engineer must have reasonable security measures in place to protect these files. In the event of loss of a seal or electronic signature, the engineer will, as soon as possible, but within 30 days of discovery, give written notification of the facts concerning the loss to board.
- (e) Preliminary documents released from a license holder's control shall identify the purpose of the document, the engineer(s) of record and the engineer license number(s), and the release date by placing the following text or similar wording on the title sheet of bound engineering reports, specifications, details, calculations or estimates, and each sheet of plans or drawings regardless of size or binding, instead of a seal: "This document is released for the purpose of (Examples: interim review, mark-up, drafting) under the authority of (Example: Leslie H. Doe, P.E. 0112) on (date). It is not to be used for (Examples: construction, bidding, permit) purposes."
- (f) License holders shall affix their seal and original signature or electronic seal and signature with the date on the final version of their engineering work before such work is released from their control.
- (1) The signature and date shall not obscure the engineer's name or license number in the seal.
 - (2) Engineering work required to bear a seal and signature includes the original title sheet of bound engineering reports, specifications, details, calculations or estimates, and each original sheet of plans or drawings regardless of size or binding.
 - (3) All other engineering work, including but not limited to research reports, opinions, recommendations, evaluations, addenda, documents produced for litigation, and engineering software shall bear the engineer's printed name, date, signature and the designation "P.E." or other terms as described in §137.1 of this chapter (relating to License Holder Designations). A seal may be added on such work if required or at the engineer's discretion.
- (g) Work performed by more than one license holder shall be sealed in a manner such that all engineering can be clearly attributed to the responsible license holder or license holders. When sealing plans or documents on which two or more license holders have worked, the seal and signature of each license holder shall be placed on the plan or document with a notation describing the work done under each license holder's responsible charge.
- (h) Licensed employees of the state, its political subdivisions, or other public entities are responsible for sealing their original engineering work; however, such licensed employees engaged in review and evaluation for compliance with applicable law or regulation of engineering work submitted by others, or in the preparation of general planning documents, a proposal for decision in a contested case or any similar position statement resulting from a compliance review, need not seal the review reports, planning documents, proposals for decision, or position statements.
- (i) A license holder, as a third party, may alter, complete, correct, revise, or add to the work of another license holder when engaged to do so by a client, provided:
- (1) the first license holder is notified in writing by the second license holder of the engagement immediately upon acceptance of the engagement; and
 - (2) any work altered, completed, corrected, revised, or added to shall have a seal affixed by the second license holder. The second license holder then becomes responsible for any alterations, additions or deletions to the original design including any effect or impact of those changes on the original license holder's design.
- (j) A local authority may require an original seal and/or signature on reproduced documents.
- (k) A plan, specification, plat, or report issued by a license holder for a project to be constructed or used in this state must include the license holder's seal placed on the document. A license holder is not required to use a seal if the project is to be constructed or used in another state or country.
- (l) An engineer may securely transmit his or her final version of engineering work electronically provided that work bears the engineer's seal and uses one of the techniques described in §137.35(a) of this chapter (relating to Electronic Seals and Electronic Signatures) and must employ reasonable security measures to make the documents unalterable. Electronic correspondence of this type may be followed by a hard copy containing the engineer's printed name, date, signature and the designation "P.E." or other terms described in §137.1 of this chapter (relating to License Holder Designations).
- (m) A license holder is not required to use a seal for a project for which the license holder is not required to hold a license under an exemption set forth under the Act, Texas Occupation Code §§1001.051 - 1001.066.
- (n) All engineering documents released, issued, or submitted by a licensee, including preliminary documents, shall clearly indicate the firm name and registration number of the engineering firm by which the engineer is employed.
- (1) If the engineer is employed by a local, State, or Federal Government agency, then only the name of the agency shall be required.
 - (2) If the engineer is exempt from sealing a document under subsection (m) of this section, but elects to seal a document, then only the name of the employer shall be required.
- (o) Use of a seal that is not in compliance with the requirements of §137.31 of this title (relating to Seal Specifications) by a license holder is a violation of Board rules and subject to sanctions.

§137.35 ELECTRONIC SEALS AND ELECTRONIC SIGNATURES

(a) Licensed professional engineers shall maintain the security of their electronic seals and electronic signatures. The following methods are allowed:

(1) Licensed professional engineers may electronically copy their original hard copy work that bears their seal, original signature, and date and transmit this work in a secure electronic format.

(2) An engineer may create an electronic seal and electronic signature for use in transmitting electronically formatted engineering work, regardless of whether the work was originally in hard copy or electronic format.

(b) As an alternative to electronic sealing and electronic signatures, engineers shall affix their original seals and signatures and date to their engineering work as specified in §137.33(f) of this chapter (relating to Sealing Procedures).

§137.37 SEALING MISCONDUCT

(a) A license holder is guilty of misconduct and subject to disciplinary action if the license holder:

(1) knowingly signs or seals any engineering document or product if its use or implementation may endanger the health, safety, property or welfare of the public.

(2) signs or affixes a seal on any document or product when the license is inactive or has been revoked, suspended, or has expired.

(3) alters a sealed document without proper notification to the responsible license holder.

(4) allows others access to his or her electronic files containing his or her seal and/or electronic signature, unless access is explicitly authorized for particular engineering work.

(b) A person not licensed by the board shall not use, cause to be used, affix, or cause to be affixed or in any other manner, regardless of the means, attach or in any way depict an engineering seal or a representation of an engineering seal without the express permission of the currently active licensee.

(c) A person shall not use, cause to be used, affix, cause to be affixed, or in any other manner, regardless of the means, attach or in any way depict a fraudulent engineering seal or a fraudulent representation of an engineering seal.

SUBCHAPTER C: PROFESSIONAL CONDUCT AND ETHICS

§137.51 GENERAL PRACTICE

(a) In order to safeguard, life, health and property, to promote the public welfare, and to establish and maintain a high standard of integrity and practice, the rules relating to professional conduct in this title shall be binding on every person holding a license authorized to offer or perform engineering services in Texas.

(b) License holders having knowledge of any alleged violation of the Act and/or board rules shall cooperate with the board in furnishing such information or assistance as may be required.

(c) A license holder shall respond to the board in writing to all written requests for information regarding all inquiries under the jurisdiction of the board within 21 days of receipt or by the date specified in board correspondence. A license holder shall fully comply with final decisions and orders of the board. Failure to comply with these matters will constitute a separate offense of misconduct and will subject the license holder to any of the penalties provided under §1001.451(2), (3), or (4) and §1001.502 of the Act.

(d) Any license holder who directly or indirectly enters into any contract, arrangement, plan, or scheme with any person, firm, partnership, association, or corporation or other business entity which in any manner results in a violation of §137.77 of this title (relating to Firm Registration Compliance) shall be subject to legal and disciplinary actions available to the board. Professional engineers shall perform or directly supervise the engineering work of any subordinates as characterized in §131.81(10) of this title (relating to Definitions). Under no circumstances shall engineers work in a part-time arrangement with a firm not otherwise in full compliance with §137.77 of this chapter (relating to Firm Registration Compliance) in a manner that could enable such firm to offer or perform professional engineering services.

(e) A licensed professional engineer may offer or perform engineering services on a full or part-time basis as a firm (including a sole practitioner) or other business entity if registered pursuant to the requirements of Chapter 135 of this title (Relating to Firm Registration).

§137.53 ENGINEER STANDARDS OF COMPLIANCE WITH PROFESSIONAL SERVICES PROCUREMENT ACT

(a) A licensed engineer shall not submit or request, orally or in writing, a competitive bid to perform professional engineering services for a governmental entity unless specifically authorized by state law and shall report to the board any requests from governmental entities and/or their representatives that request a bid or cost and/or pricing information or any other information from which pricing or cost can be derived prior to selection based on demonstrated competence and qualifications to perform the services.

(b) For the purposes of this section, competitive bidding to perform engineering services includes, but is not limited to, the submission of any monetary cost information in the initial step of selecting qualified engineers. Cost information or other information from which cost can be derived must not be submitted until the second step of negotiating a contract at a fair and reasonable cost.

(c) This section does not prohibit competitive bidding in the private sector.

§137.55 ENGINEERS SHALL PROTECT THE PUBLIC

(a) Engineers shall be entrusted to protect the health, safety, property, and welfare of the public in the practice of their profession. The public as used in this section and other rules is defined as any individual(s), client(s), business or public entities, or any member of the general population whose normal course of life might reasonably include an interaction of any sort with the engineering work of the license holder.

(b) Engineers shall not perform any engineering function which, when measured by generally accepted engineering standards or procedures, is reasonably likely to result in the endangerment of lives, health, safety, property, or welfare of the public. Any act or conduct which constitutes incompetence or gross negligence, or a criminal violation of law, constitutes misconduct and shall be censurable by the board.

(c) Engineers shall first notify involved parties of any engineering decisions or practices that might endanger the health, safety, property or welfare of the public. When, in an engineer's judgment, any risk to the public remains unresolved, that engineer shall report any fraud, gross negligence, incompetence, misconduct, unethical or illegal conduct to the board or to proper civil or criminal authorities.

Source Note: The provisions of this §137.55 adopted to be effective May 20, 2004, 29 TexReg 4878; amended to be effective July 3, 2022, 47 TexReg 3687

§137.57 ENGINEERS SHALL BE OBJECTIVE AND TRUTHFUL

(a) Engineers shall issue statements only in an objective and truthful manner. The issuance of oral or written assertions in the practice of engineering shall not be:

- (1) fraudulent;
- (2) deceitful; or
- (3) misleading or shall not in any manner whatsoever tend to create a misleading impression.

(b) Engineers shall make affected parties aware of the engineers' professional concerns regarding particular actions or projects, and of the consequences of engineering decisions or judgments that are overruled or disregarded.

(c) The engineer shall disclose a potential conflict of interest to a potential or current client or employer upon discovery of the possible conflict.

(d) A potential conflict of interest exists when an engineer accepts employment when a reasonable probability exists that the engineer's own financial, business, property, or personal interests may affect any professional judgment, decisions, or practices exercised on behalf of the client or employer. An engineer may accept such an employment only if all parties involved in the potential conflict of interest are fully informed in writing and the client or employer confirms the knowledge of the potential conflict in writing. An engineer in a potential conflict of interest employment shall maintain the interests of the client and other parties as provided by §137.61 of this title (relating to Engineers Shall Maintain Confidentiality of Clients) and other rules and statutes.

§137.59 ENGINEERS' ACTIONS SHALL BE COMPETENT

(a) Engineers shall practice only in their areas of competence.

(b) The engineer shall not perform any engineering assignment for which the engineer is not qualified by education or experience to perform adequately and competently. However, an engineer may accept an assignment which includes phases outside of the engineer's area of competence if those other phases are performed by qualified licensed professionals, consultants, associates, or employees.

(c) The engineer shall not express an engineering opinion in deposition or before a court, administrative agency, or other public forum which is contrary to generally accepted scientific and engineering principles without fully disclosing the basis and rationale for such an opinion. Engineering opinions which are rendered as expert testimony and contain quantitative values shall be supported by adequate modeling or analysis of the phenomena described.

§137.61 ENGINEERS SHALL MAINTAIN CONFIDENTIALITY OF CLIENTS

(a) The engineer may reveal confidences and private information only with a fully informed client's or employer's consent, or when required by law or court order; or when those confidences, if left undisclosed, would constitute a threat to the health, safety or welfare of the public.

(b) The engineer shall not use a confidence or private information regarding a client or employer to the disadvantage of such client or employer or for the advantage of a third party.

(c) The engineer shall exercise reasonable care to prevent unauthorized disclosure or use of private information or confidences concerning a client or employer by the engineer's employees and associates.

§137.63 ENGINEERS' RESPONSIBILITY TO THE PROFESSION

(a) Engineers shall engage in professional and business activities related to the practice of engineering in an honest and ethical manner.

(b) The engineer must:

- (1) meet all of the applicable professional practice requirements of federal, state and local statutes, codes, regulations, rules, ordinances or standards in the performance of engineering services;
- (2) exercise reasonable care or diligence to prevent the engineer's partners, associates, and employees from engaging in conduct which, if done by the engineer, would violate any provision of the Texas Engineering Practice Act, general board rule, or any of the professional practice requirements of federal, state and local statutes, codes, regulations, rules or ordinances in the performance of engineering services;

- (3) exercise reasonable care to prevent the association of the engineer's name, professional identification, seal, firm or business name in connection with any venture or enterprise which the engineer knows, or should have known, is engaging in trade, business or professional practices of a fraudulent, deceitful, or dishonest nature, or any action which violates any provision of the Texas Engineering Practice Act or board rules.
- (4) act as faithful agent for their employers or clients;
- (5) conduct engineering and related business affairs in a professional manner in interactions with involved parties and employees. Unprofessional conduct may include, but is not limited to, misrepresentation in billing; sale and/or performance of unnecessary work; or conduct that harasses or intimidates another party; and
- (6) practice engineering in a careful and diligent manner.

(c) The engineer shall not:

- (1) aid or abet, directly or indirectly, any unlicensed person or business entity in the unlawful practice of engineering;
- (2) maliciously injure or attempt to injure or damage the personal or professional reputation of another by any means. This does not preclude an engineer from giving a frank but private appraisal of engineers or other persons or firms when requested by a client or prospective employer;
- (3) retaliate against a person who provides reference material for an application for a license or who in good faith attempts to bring forward an allegation of wrongdoing;
- (4) give, offer or promise to pay or deliver, directly or indirectly, any commission, gift, favor, gratuity, benefit, or reward as an inducement to secure any specific engineering work or assignment;
- (5) accept compensation or benefits from more than one party for services pertaining to the same project or assignment; or
- (6) solicit professional employment in any false or misleading advertising.

(d) Engineers should strive to promote responsibility, commitment, and ethics both in the education and practice phases of engineering. They should attempt to enhance society's awareness of engineers' responsibilities to the public and encourage the communication of these principles of ethical conduct among engineers.

§137.65 ACTION IN ANOTHER JURISDICTION

- (a) The engineer shall not practice or offer to practice engineering in any other jurisdiction in violation of the laws regulating the practice of professional engineering in that jurisdiction. A finding by such jurisdiction of illegal practice or offer to practice is misconduct and will subject the engineer to disciplinary action in Texas.

§138.33 SEALING PROCEDURES

- (a) The purpose of the registered professional land surveyors and licensed state land surveyor seal is to assure the user of the surveying product that the work has been performed or directly supervised by the professional surveyor named and to delineate the scope of the surveyor's work.
- (b) Registration and licensed holders shall only seal work done by them, performed under their direct supervision as defined in §131.2 of this title (relating to Definitions). Upon sealing, surveyors take full professional responsibility for that work.

- (c) When a license or registration holder reviews and elects to incorporate the work products of others into a signed and sealed survey document, those items shall be clearly labeled as such and shall clearly indicate the identity of the originator.
- (d) Registration holders shall take reasonable steps to ensure the security of their physical or electronic seals and electronic signatures. For electronic seals and electronic signatures, the surveyor must have reasonable security measures in place to protect these files. In the event of loss of a seal or electronic signature, the surveyor will, as soon as possible, but no later than 30 days of discovery, give written notification of the facts concerning the loss to the board.
- (e) Preliminary documents released from a land surveyor's control shall identify the purpose of the document, the land surveyor of record and the land surveyor's registration number, and the release date. Such preliminary documents shall not be signed or sealed and shall bear the following statement in the signature space or upon the face of the document: "Preliminary, this document shall not be recorded for any purpose and shall not be used or viewed or relied upon as a final survey document". Preliminary documents released from the land surveyor's control which include this text in place of the land surveyor's signature need not comply with the other minimum standards promulgated in this chapter.
- (f) License and registration holders shall affix their seal and original signature or electronic seal and signature with the date on the final version of their professional surveying work before such work is released from their control. The signature and date shall not obscure the surveyor's name or registration number in the seal.
- (g) Work performed by more than one registration holder shall be sealed in a manner such that all surveying work can be clearly attributed to the responsible registration holder or registration holders. When surveying work on which two or more registration holders have worked, the seal and signature of each registration holder shall be placed on the surveying work with a notation describing the work done under each registration holder's responsible charge.
- (h) Registered employees of the state, its political subdivisions, or other public entities are responsible for sealing their original surveying work; however, such registered employees engaged in review and evaluation for compliance with applicable law or regulation of surveying work submitted by others, or in the preparation of general planning documents, a proposal for decision in a contested case or any similar position statement resulting from a compliance review, need not seal the review reports, planning documents, proposals for decision, or position statements.
- (i) A local authority may require an original seal and/or signature on reproduced documents.
- (j) Any surveying work issued by a registration holder for land or property in this state, except for surveying work that constitutes state land surveying, as defined in §1071.002 of the Surveying Act, must include the registration holder's registered professional land surveyor seal placed on the document. A registration holder is not required to use a Texas seal if the surveying work is not located in Texas.
- (k) A surveyor may securely transmit his or her final version of surveying work electronically, provided that work bears the surveyor's seal and uses one of the techniques described in §138.35(a) of this chapter (relating to Electronic Seals and Electronic Signatures) and must employ reasonable security measures to make the documents unalterable. Electronic correspondence of this type may be followed by a hard copy containing the surveyor's printed name, date, signature and the designation "R.P.L.S." or other terms described in §138.1 of this chapter (relating to Registration Holder Designations).
- (l) A registration holder is not required to use a seal for a project for which the registration holder is not required to hold a registration under the Surveying Act.
- (m) All surveying documents released, issued, or submitted by a registration holder, including preliminary documents, shall clearly indicate the firm name and registration number of the surveying firm by which the professional surveyor is employed.
- (1) If the surveyor is employed by a local, State, or Federal Government agency, then only the name of the agency shall be required.
 - (2) If the surveyor is exempt from sealing a document under subsection (l) of this section, but elects to seal a document, then only the name of the employer shall be required.
- (n) A licensed state land surveyor must sign and seal surveying documents and surveying work submitted to the General Land Office, including field notes, plats, and reports, with the licensee's licensed state land surveyor seal. In addition to being signed and sealed with the licensed state land surveyor's seal, state land surveying documents and surveying work must also include the licensed state land surveyor's printed name and license number.
- (o) Use of a seal that is not in compliance with the requirements of §138.31 of this title (relating to Seal Specifications) by a registration or license holder is a violation of Board rules and subject to sanctions.
